

## **DESCRIPTION**

The SafeKIBO project was implemented under the Action “Innovation Investment Plans” of the Programme “Central Macedonia” of the ESPA 2021–2027, co-funded by the European Regional Development Fund and National Resources. The project commenced in October 2021 and was completed in February 2025.

It is an innovative, modular surveillance system that upgrades the KIBO units of G. GLENTOS S.A. with advanced equipment such as optical and thermal cameras, sensors, and UAV systems. Through the use of specialized algorithms, it provides capabilities for threat detection, identification, and monitoring, even in areas with limited accessibility, offering flexibility and adaptability to the needs of each application.
